Weather Key Points

Regional Operations Center

Western Region

Friday, September 23

- Drier and warmer weather will persist through the middle of next week
 - Moderate heat risk concerns are expected across southern California early next week
 - Temperatures statewide will be about 5-10 degrees above normal this weekend through early next week
- Dry and breezy conditions will bring locally elevated fire weather conditions to southern California through next week, with some locally gusty winds also expected over the Sierra and Modoc Plateau for midweek

Precipitation Forecast

Regional Operations Center

Western Region

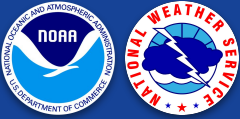

Friday, September 23

No precipitation is expected through the weekend

Important Note: Forecast precipitation amounts are an average for any particular location. Thunderstorms will produce locally much higher rainfall amounts.

Precipitation (inches)

Weather Outlook (6-14 Days)

Regional Operations Center
Western Region
Friday, September 23
